# ▶ Prodigy VoIP PBX

## ▶ COMPETITIVE DIFFERENCES

Enterprise functionality at affordable pricing

All in one unit solution

Complete web-based management

Configuration in minutes

Scalable and redundant up to 12,000 phones

Complete 3rd party interoperability

Web access to voicemail and FAX

Supports 500+ phone models

Share one PBX with multiple businesses

## ▶ BENEFITS

### Mobility

Connects to your phone system from any wired or wireless connection; deploys one system for multiple locations using one operator and dial plan

### Flexibility

Deploys quickly and integrates easily; allows clients to add, modify, and delete extensions, dial plans, and conference rooms from a web-based interface

### Smarts

Deploys dial plans and applications that are unavailable under legacy PBX systems

### Versatility

Interchangeable with old and new PBXs and most standards, adoptable in multiple locations; supports analog and existing digital phones

### Standards Based

Eliminates the road blocks of traditional phone systems by interoperating with other vendors and legacy platforms

### Cost Reductions

Avoids long distance charges, multiple operators and wide area dial plans; employs efficient call routing; allows maintenance of one cable plant, and more
